

Single Channel CT Clamp V3

Part No: CTV3. [868]-[902]-[928].1CH.[060A]

The Pressac Sensing V3 1 Channel CT Clamp is designed to measure and report the AC current flowing in a single channel. Powered from the measured conductor, the measured current in the channel is reported every 30 seconds using the industry standard, wireless EnOcean® protocol. With a maximum measurable current of 60A the Pressac Sensing V3 1 Channel CT Clamp is easily installed with no disturbance to the measured conductor.

Features and Benefits:

- Energy harvesting – powered from the measured cable
- Wireless communications – low installation costs, no networking required
- Rapid installation straightforward and easy set-up with no disruption
- Pluggable - for ease of installation
- No batteries to replace – no maintenance costs
- Appliance fingerprinting – Monitor the operational costs of each appliance day by day

Functionality:

- Simply clip around any single core cable
- Requires no batteries or wiring
- Requires no interruption to the power supply
- Transmits electrical current value (Amperes) wirelessly using EnOcean® technology

Applications:

- Plant energy monitoring
- Energy reduction targeting
- Sub metering

Ready for
IBM Watson IoT

Single Channel CT Clamp V3

Part No: CTV3. [868]-[902]-[928].1CH.[060A]

TECHNICAL SPECIFICATIONS

Measurement Range	1A - 60A
Frequency	50 or 60Hz
Accuracy - whichever is greater	60A = +/- 0.1A or 2%
Transmission Rate	30 Seconds
Reported Value	Channel 1 in Amps
Repeater	No
Environment	IP 4X
Enclosure Material	Nylon 66
Sample Time	Average of 5 measurements per 30 seconds
Telegram	VLD
Calibration	Not Required
Operating Temperature & Humidity Range	-5°C to +40°C; 85% RH
Storage Temperature & Humidity Range	-20°C to +55°C; 85% RH
Diameter of Measureable Conductor	60A - 10mm
Dimensions of Clamp	25mm x 22mm x 35mm approx.
Dimensions of Case	80mm x 55mm x 20mm approx.
EEP	D2-32-00

Pressac Sensing products incorporate EnOcean® wireless technology, and are fully compliant with EnOcean® protocols. The Pressac Sensing range can be integrated with EnOcean® products from over 300 global manufacturers.

EnOcean® is a widely established and global technology, and has been installed in over 250,000 buildings worldwide. The EnOcean® wireless standard is the first to be ratified as an international standard - ISO/IEC 14543-3-10: together with the EnOcean® Equipment Profiles (EEPs) drawn up by the EnOcean® Alliance, this international standard lays the foundation for fully interoperable, open wireless technology comparable to standards such as Bluetooth and WiFi. The standard can be downloaded from www.iso.org.
